

Tiptel – the European Company Group

tiptel

Tiptel – the European company group specialized in information and communication technologies

With 40 years of experience in the information and telecommunication market and subsidiaries in important European countries Tiptel can rightfully claim to be a significant European player in this field. Tiptel demonstrates an uncompromising orientation towards the market and its needs, dedicated to innovation and quality.

The beginnings were made with the development and production of automatic dialers in the 1970ies. Today Tiptel is one of the most important developer, manufacturer and supplier of telephone sets for residential and business customers in Europe. The collaboration with specialised partners from all over the world is getting ever more important.

Given this reputation, Tiptel aims to preserve its high standards of quality as laid down in the company's mission statement.
